DETAILED ACTION

Election/Restrictions

1 Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-10, drawn to process for automatically loading a desired amount of powder material, classified in class 264, subclass 40.5.
- II. Claims 11-22, drawn to apparatus for automatically loading a desired amount of powder material, classified in class 425, subclass 259.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the process as claimed can be practiced by another materially different apparatus, such as one without a conveyor belt where the mold is conveyed by hand instead.

3 Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4 A telephone call was made to Mr. Robert J. Seas on March 13, 2002 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Priority

5. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.
